

Vocabulary

congruent

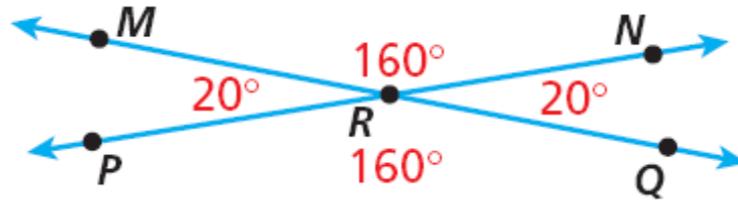

vertical angles

adjacent angles

complementary angles

supplementary angles

Congruent angles have the same measure.

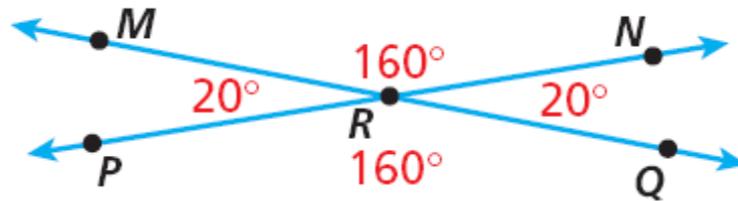

Vertical angles are formed opposite each other when two lines intersect. Vertical angles have the same measure, so they are always congruent.

$\angle MRP$ and $\angle NRQ$ are vertical angles.

$\angle MRN$ and $\angle PRQ$ are vertical angles

Adjacent angles are side by side and have a common vertex and ray. Adjacent angles may or may not be congruent.

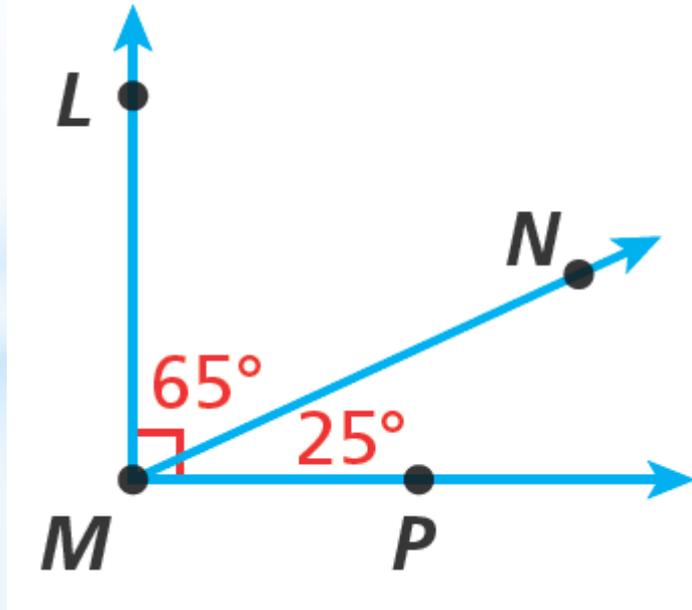

$\angle MRN$ and $\angle NRQ$ are adjacent angles. They share vertex R and \overrightarrow{RN} .

$\angle NRQ$ and $\angle QRP$ are adjacent angles. They share vertex R and \overrightarrow{RQ} .

Complementary angles are two angles whose measures have a sum of 90° .

$$65^\circ + 25^\circ = 90^\circ$$

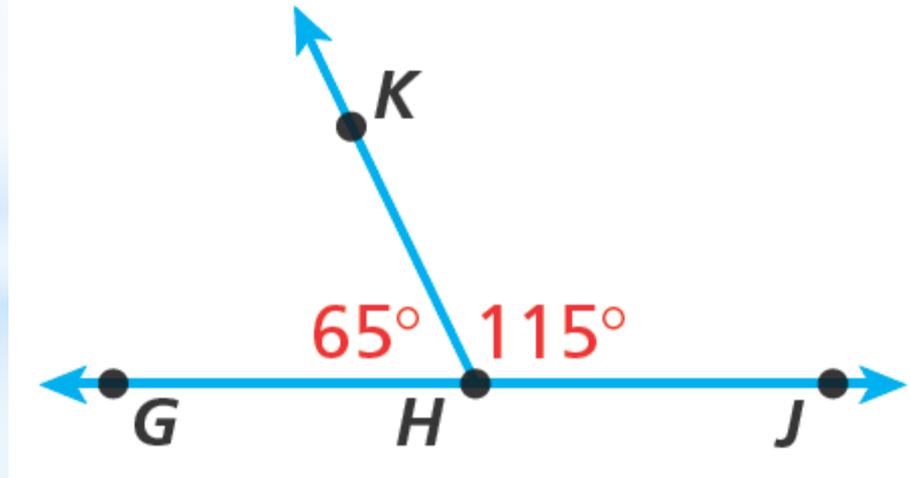

$\angle LMN$ and $\angle NMP$ are complementary.

Supplementary angles are two angles whose measures have a sum of 180° .

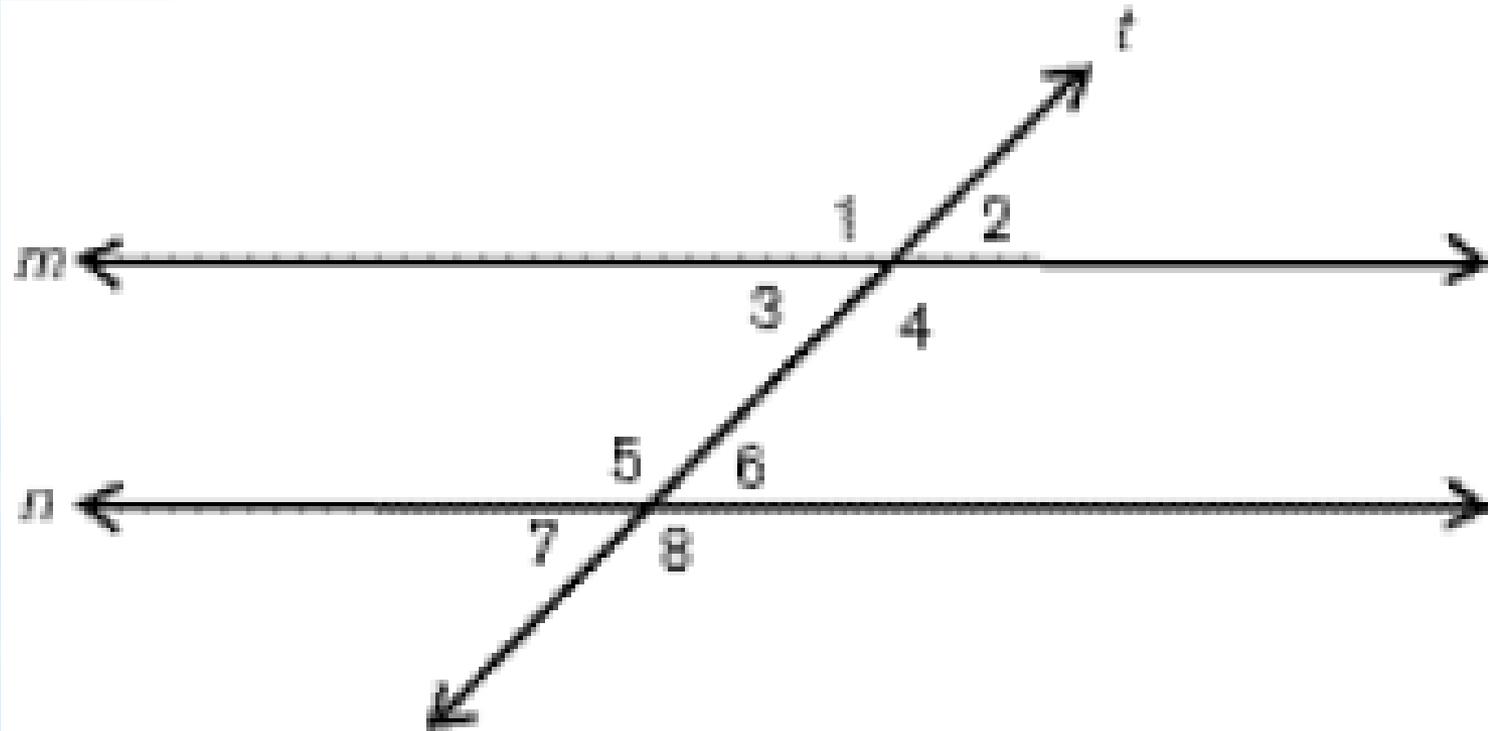

$$65^\circ + 115^\circ = 180^\circ$$

$\angle GHK$ and $\angle KHJ$ are supplementary.

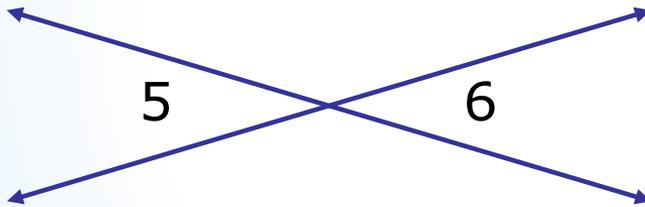

*Transversal Line

When two parallel lines are cut by a third line, the third line is called the *transversal*.

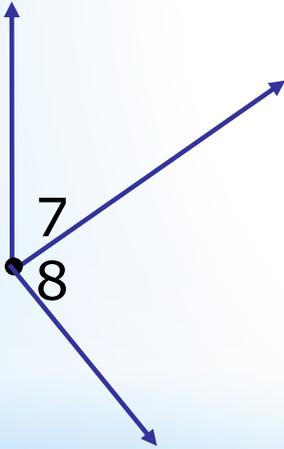

Identify the type of each angle pair shown.

$\angle 5$ and $\angle 6$ are opposite each other and are formed by two intersecting lines.

They are vertical angles.

Identify the type of each angle pair shown.

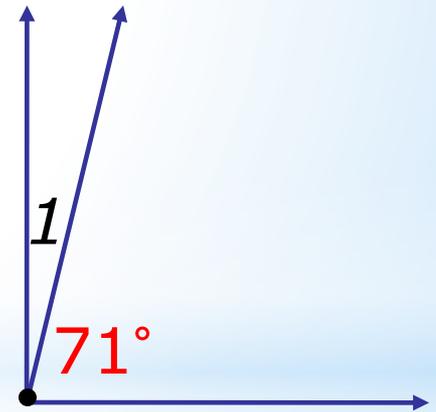

$\angle 7$ and $\angle 8$ are side by side and have a common vertex and ray.

They are adjacent angles.

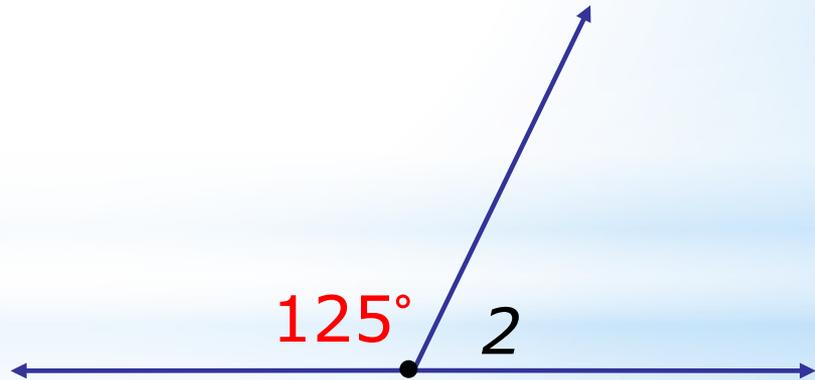

Find each unknown angle measure.

The angles are complementary.

Find each unknown angle measure.

The angles are supplementary.

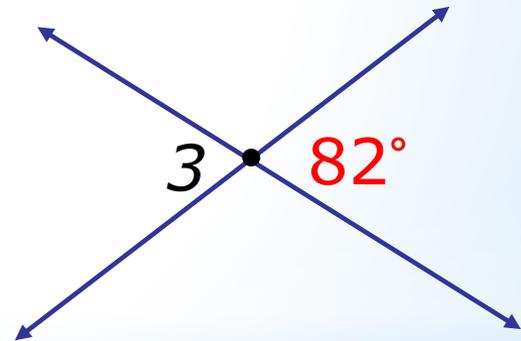

Additional Example 2C: Identifying an Unknown Angle Measure

Find each unknown angle measure.

The angles are vertical angles.

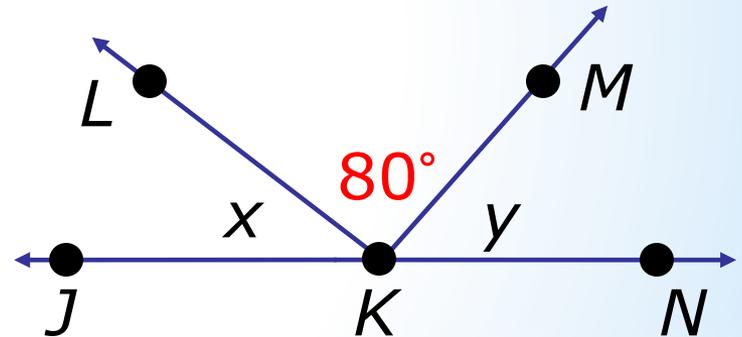

$$m\angle 3 = 82^\circ$$

*Vertical angles
are congruent.*

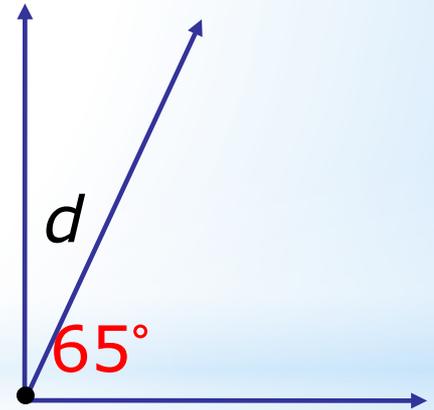

Find each unknown angle measure.

$\angle JKL$ and $\angle MKN$ are congruent.

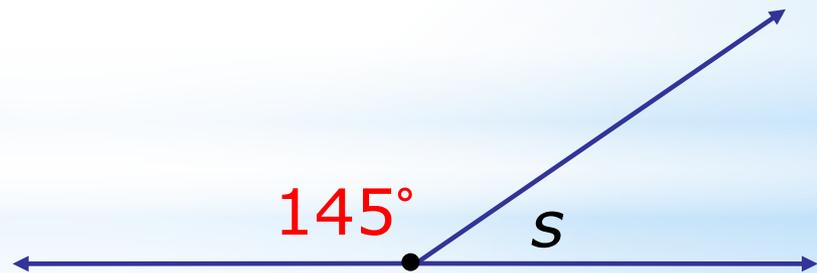

Find each unknown angle measure.

The angles are complementary.

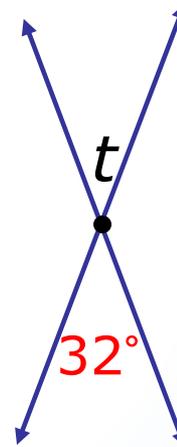

Find each unknown angle measure.

The angles are supplementary.

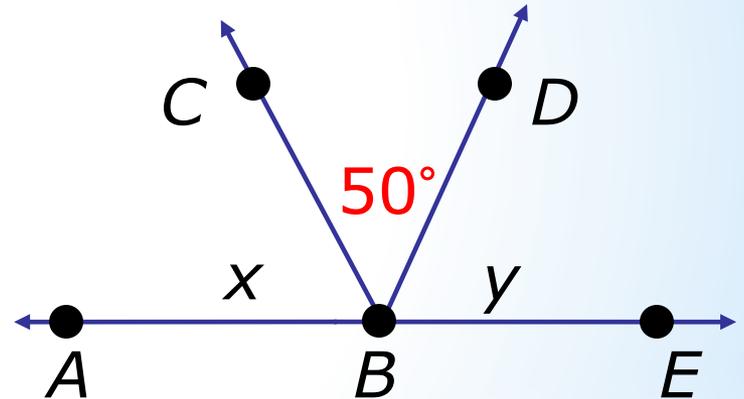

Find each unknown angle measure.

The angles are vertical angles.

Find each unknown angle measure.

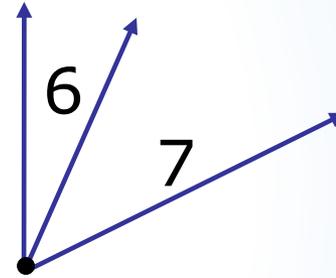

$\angle ABC$ and $\angle DBE$ are congruent.

Lesson Quiz

1. Identify the type of angle pair shown.

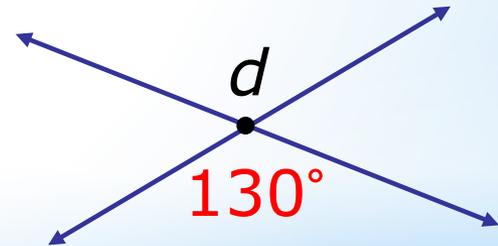

adjacent

Find each unknown angle measure.

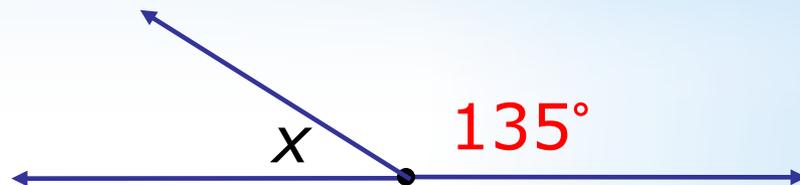

2. The angles are vertical angles.

$$d = 130^\circ$$

3. The angles are supplementary.

$$x = 45^\circ$$

Lesson Quiz for Student Response Systems

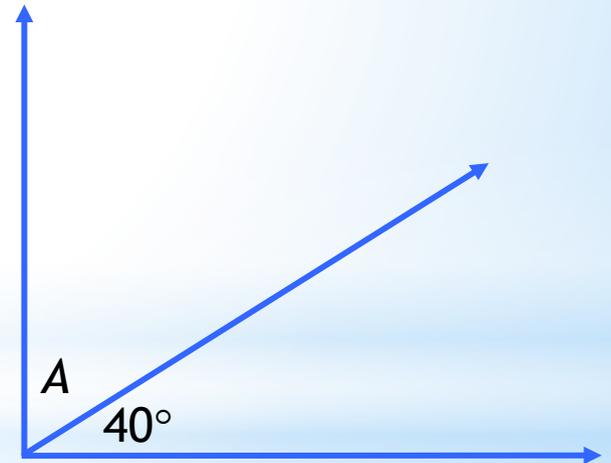

2. Identify the unknown angle measure if the angles are complementary.

A. 40°

B. 50°

C. 90°

D. 140°

Lesson Quiz for Student Response Systems

3. Identify the unknown angle measure if the angles are supplementary.

A. $y = 145^\circ$

B. $y = 125^\circ$

C. $y = 90^\circ$

D. $y = 35^\circ$
